

What Actually Is AI? - Answer Key (60 MCQs)

Quick Key

Q1: A	Q2: B	Q3: D	Q4: D	Q5: B	Q6: A	Q7: B	Q8: D	Q9: A	Q10: B
Q11: D	Q12: D	Q13: C	Q14: C	Q15: B	Q16: A	Q17: A	Q18: C	Q19: D	Q20: C
Q21: B	Q22: C	Q23: A	Q24: B	Q25: A	Q26: B	Q27: D	Q28: C	Q29: A	Q30: B
Q31: C	Q32: A	Q33: D	Q34: B	Q35: A	Q36: A	Q37: D	Q38: B	Q39: C	Q40: A
Q41: B	Q42: B	Q43: D	Q44: A	Q45: C	Q46: A	Q47: A	Q48: C	Q49: B	Q50: A
Q51: B	Q52: D	Q53: B	Q54: C	Q55: C	Q56: D	Q57: B	Q58: A	Q59: D	Q60: C

With Reasons

Q	Ans	Reason
Q1	A	Interprets open-ended request, not exact-match lookup
Q2	B	Infers likely outcome from patterns, not fixed computation
Q3	D	Defining trait is learning from data, not being impressive
Q4	D	Fixed formulas; no learning or prediction
Q5	B	Learned from historical data, not a fixed rate table
Q6	A	Executes explicit rules; no learning from data
Q7	B	Trained on image patterns, not an admin-set rule
Q8	D	Suggestion derived from learned user patterns
Q9	A	Adapts from learned patterns, not fixed schedule
Q10	B	Classifies the cause of motion instead of reacting to all
Q11	D	Would be AI-like only if it learned from data
Q12	D	Infers intent from unstructured speech, not keypress
Q13	C	ML is one approach to AI; not all AI is ML
Q14	C	ML is itself a main way of building AI
Q15	B	ML adjusts numerical parameters, not its own code
Q16	A	Probabilistic output is normal for ML/AI
Q17	A	Training: learning from data before use
Q18	C	Inference: output for new input, no permanent change
Q19	D	Inference doesn't change learned patterns
Q20	C	Training first, then inference
Q21	B	More complete, relevant data gives more reliable patterns
Q22	C	Performance depends on training data; underrepresented cases suffer
Q23	A	Outputs reflect training-data patterns, including bias
Q24	B	Too little data limits generalization
Q25	A	A prediction/estimate, not a guarantee
Q26	B	Probability prediction from learned patterns
Q27	D	Model weighs subtle differences in data
Q28	C	80% still allows 20% no-rain; one outcome proves nothing
Q29	A	Detects deviation from learned normal behavior
Q30	B	Recognizes recurring visual patterns (faces) and groups them

Q	Ans	Reason
Q31	C	Generalizes from many examples to similar new defects
Q32	A	Recognizes learned spam patterns, not exact matches
Q33	D	Generative AI creates new content
Q34	B	Generates by predicting patterns, not retrieving
Q35	A	Learned visual patterns recombined into new outputs
Q36	A	Fluent text can still be factually wrong; verify
Q37	D	Narrow AI: one specific task or limited set
Q38	B	Current AI is narrow; general AI doesn't exist yet
Q39	C	Narrow system: excels in one domain only
Q40	A	Several trained features is still narrow AI
Q41	B	Price derived from analysing historical + current data
Q42	B	Trained on paired language data, not word-for-word lookup
Q43	D	Image recognition: classifying photo content
Q44	A	Interprets varied, unpredictable sensor data in real time
Q45	C	Predicts empathetic-sounding text; no real feelings
Q46	A	Learns from human data, so can reflect/amplify bias
Q47	A	Confidence is learned style, not an accuracy check
Q48	C	Statistical pattern learning differs from human thought
Q49	B	Good at summarizing, unreliable for unknowable future
Q50	A	Errors, bias and no contextual judgment make it risky
Q51	B	Estimates understanding from answer patterns
Q52	D	Combines learned patterns without human-like understanding
Q53	B	Performs poorly on inputs unlike training data
Q54	C	Fluency is not accuracy (hallucination)
Q55	C	Little/no training data for that dialect
Q56	D	Performance sensitive to conditions unlike training
Q57	B	Ongoing human oversight/refinement after deployment
Q58	A	Humans supply labeled data for training
Q59	D	AI assists human judgment, esp. sensitive decisions
Q60	C	Expert check; AI errs and lacks accountability/context
